MAP DOCUMENTATION

Geochemical data from surficial materials were obtained, digitized and compiled herein from various sources. Most of the soil geochemical data were captured from historical assessment reports filed with the Ministry of Energy, Mines and Petroleum Resources of British Columbia's ARIS system, and other public data sources.

This map and related data and map products are results from the "Geochemical Models for BC Porphyry Deposits: Outcropping, Blind and Buried Examples" project conducted by Fred Blaine, Sara Jenkins and Craig J.R. Hart at MDRU and funded by Geoscience BC (Geoscience BC Project 2009-048). Additional cartographic support was provided by Gabrielle Barbosa da Silva. Source information for the various data provided in this map package can be found in the accompanying Project Documentation file.

Although all attempts have been made to ensure that the information provided herein is valid, due to the historical nature of most of the geochemical data, neither Geoscience BC, nor the authors, assume any liability for the correctness of the data or their use in this or any derivative products.

MAP SPECIFICATIONS

Coordinate System: NAD 1983 UTM Zone 10N

Projection: Transverse Mercator

Datum: North American 1983

Units: Meter

Printing Date: 22/11/2016
