D-6-H 94-O-11

Logged by: PETREL ROBERTSON CONSULTING LTD.

Remarks: Core #1: 1394-1454' (Rec. 56')

3.5" core, slabbed	
--------------------	--

Clearly a competition between marine influx and clastic supply - more terrestrial than other sections, with little open marine material and abundant cross-bedded sandstone - some relatively coarse and clean.
